

Edlio Top 10 Security Features

1. Annual independent Security Penetration Testing
2. Monthly vulnerability scanning and remediation using leading industry security tools
3. Cloud based solutions engineered with security as a priority
4. Serverless Application Architecture that eliminates security vulnerabilities that are common in many popular server operating systems
5. Nationwide content delivery network (CDN) to improve website performance and provide enhanced business continuity
6. Single Sign-On (SSO) support for popular Identity Providers (IDPs)
7. Optional two factor authentication (2FA) support for administrator and end user authentication
8. Advanced network protection technologies to prevent DDoS, brute force, API traffic surge and other coming attack trajectories
9. Geo-IP filtering to eliminate access from known bad actor countries such as North Korea and Russia
10. Annual recurring security training for all Edlio staff to identify and respond to common security threats

Bonus! Level 1 Payment Card Industry (PCI) certification for the Online Payment Processing Module (Highest security certification level in the payment industry)
